Programm

11.15	Willkommen Mirjam Christ-Crain und Christiane Pauli-Magnus, Co-Leiterinnen DKF
	Keynote Lecture
11.30	Improving value of biomedical research: Lessons learned from COVID-19 <i>Prof. Ulrich Dirnagl, Charité Berlin</i> Moderation: Lars Hemkens, DKF
	Session 1 - Kurzpräsentationen
12.20	- Systematic screening on admission for SARS-CoV-2 to detect asymptomatic infections <i>Rahel Stadler</i> - Risk of non-AIDS and AIDS defining malignancies of early versus deferred antiretroviral initiation <i>Frederique Chammartin</i> - Effects of Interleukin-1 Antagonism on Hyperandrogenemia in Women with Polycystic Ovary Syndrome <i>Milica Popovic</i> - COVID-evidence: a living platform to improve COVID-19 research and collaboration <i>Perrine Janiaud</i> Moderation: Roland Buhl und Maria Pia Sormani, Mitglieder DKF Scientific Advisory Board
	Session 2 - Kurzpräsentationen
13.10	0/2h-Algorithm using High-Sensitivity Cardiac Troponin I in the Diagnosis of Myocardial Infarction <i>Luca Köchlin</i> - Optical Coherence Tomography as a marker of Neuronal Loss and Disability in Multiple Sclerosis <i>Nuria Cerda Fuertes</i> - AURORA - a 3D model guided fresh frozen section study in nerve sparing radical prostatectomy <i>Christian Engesser</i> - Impact of air pollution on lung function in preterm and term born infants; a birth cohort study <i>Fabienne Decrue</i> Moderation: Markus Zabel und Marco Valgimigli, Mitglieder DKF Scientific Advisory Board
14.00	Publikumsvoting

Session 3 - Rapid Fire Präsentationen

- Post Intensive Care Syndrome in out-of-hospital cardiac arrest patients
Alessia Vincent
- Barrett oesophagus and reflux-esophagitis five years after LSG and LRYGB
Bettina Wölnerhanssen
- Blood pressure control through monotherapy in treatment-naïve patients with arterial hypertension
Annina Vischer
- Maintenance of Acute Stroke Care Service during the COVID-19 pandemic lockdown
Valerian Altersberger
- 14.10 • Potential of a short-term, high-dose probiotic supplementation as adjuvant therapy in depression
Anna-Chiara Schaub
- Development of a risk-based trial management and central monitoring concept
Katharina Klatte
- Intrathecal Immunoglobulin M synthesis is associated with higher disease activity and severity in MS
Johanna Oechtering
- Findings consistent with subclinical vasculitis in patients with new onset polymyalgia
Daniele Gozzoli

Moderation: Matthias Briel, DKF

14.40 Publikumsvoting

Prämierung

14.45 Beste Kurzpäsentationen und Rapid Fire Präsentationen

Schlussworte

14.50 *Steffen Eisenhardt*
Vorsitzender DKF Scientific Advisory Board
